Portfolio: napannich.github.io/vera-portfolio

PROFILE

Stylized 3D artist with an illustration background. I create props, environments and characters for fantasy worlds, focusing on readable silhouettes, clear material separation and a strong color story. Looking for a junior role or paid project work on props and environments, remote.

SELECTED 3D PROJECTS

The Horned Shopkeeper

Stylized interior scene

A fantasy shop built around one story moment: a giant ivy-covered creature behind the counter and a tiny visitor. Creature, counters, shelving and a full prop set of bottles, jars and pastries in one shared palette.

Bone Pistol

Hero prop · weapon

Dark-fantasy creature weapon mixing hard surface and organic forms: metal spine plates, bone frame, flesh and a fanged skull muzzle; four clearly separated materials.

Autumn Island

Stylized diorama

Floating island with a timber-frame cottage, stylized tree and foliage, pumpkins and a painted sky; render and short animated loop.

Characters

Horned Automaton · Masked Imp

Stone-skinned demon with mechanical limbs and gold ornament, shown in a turnaround; stylized masked character translated from a 2D sheet into 3D in Blender.

EXPERIENCE

Illustrator · freelance commissions

2023 – 2025

Story illustrations, character sheets and turnarounds, comic pages, zine fan art. Working from client briefs and references, delivering on agreed revisions.

SKILLS

Stylized hard-surface & organic modeling

Sculpting

Texturing & material separation

Composition, color & lighting for presentation

Character sheets, 2D → 3D

TOOLS

MAIN

Blender
